QUARTZ PARTNERS P.R.I.C.E. MATRIX: MACRO OUTLOOK

1-3 MONTH OUTLOOK

- POLICY
- RISK PERCEPTION
- INFLATION & INTEREST RATES
- CREDIT & LIQUIDITY
- EARNINGS & ECONOMY

	NEGATIVE	NEUTRAL	POSITIVE
POLICY			
RISK PERCEPTION			
INFLATION & INTEREST RATES			
CREDIT & LIQUIDITY			
EARNINGS & ECONOMY			

P.R.I.C.E. QUICK TAKES

POLICY: Fed is intent on raising rates until inflation cracks, with a recession or rising unemployment only catalysts for pausing if inflation does not recede... 75 basis points last meeting and projecting at least 1 more hike at the same pace; balance sheet reduction plan is in motion; Biden administration has implicitly endorsed the Fed's moves and is contemplating its own tightening via tax policy...**RISK PERCEPTION:** volatility regime continues; tech has exhibited some strength since recession concerns brought down 10yr (tech as duration play); "Crypto Winter" having negative wealth effect impact on speculative stocks**INFLATION & INTEREST RATES:** non-US central banks sans ECB/BoJ have begun to take action to curb inflation; mortgage rates >5% threatens real estate market; inflation rate remains >9% ...**CREDIT & LIQUIDITY:** high yield spreads are on the rise, esp. since the 10yr caught a bid on May 9; potential downgrades a risk on the default side; bank liquidity robust but dark clouds on the horizon if refinancing activity slows...**EARNINGS & ECONOMY:** supply chain issues have begun to ease, yet so may have consumer demand. China lockdowns, still ongoing intermittently, threaten to worsen the situation. Q1 GDP came in at -1.6 on declines in trade and defense spending.

RISK WATCH: growth concerns on the rise yet inflation remains stubbornly high, supply chain disruptions, foreign exchange dislocations with USD surging, potential for technical recession.

TALKING POINTS

The stock market slipped just short of 1% last week, with the S&P 500 dropping 0.9% and the Nasdaq Composite Index falling 1.6%. Small cap stocks also fell with the broad stock market, with the Russell 2000 Index falling 1.4%. The Energy (-3.1%) and Communication Services (-3.3%) sectors saw the biggest drops, while defensive plays Consumer Staples (+0.1%) and Utilities (-0.1%) finished the week with the best relative performance. Treasury yields fell on growth concerns, with the 10-year benchmark yield falling to 2.93% from 3.09%. High yield bond spreads rose slightly from 536bps to 539bps.

The most impactful economic data release of the week was the June inflation report (CPI), which showed a hotter than expected 9.1% rise in US prices since last year. Going down the list of CPI components, energy prices are up 41.6%, food prices jumped 10.4%, and shelter costs are 5.6% higher on a

year-over-year basis. The strong inflation data likely precludes any reduction in planned rate hikes by the Fed for its July meeting. However, there are signs that prices may have peaked for at least the near-term: commodity prices have fallen sharply since June (see the one-year chart of the CRB Commodity Index below).

Expectations for upcoming CPI releases based on declines in commodity prices helped the stock market digest Wednesday's bearish data and finish the week on a high note.

JPMorgan reported earnings last Thursday and painted a bleak picture for the US economy based on its projections for loan losses and overall outlook. Citi, who also reported last week, also built up \$375 million in reserves in anticipation of delinquencies. With the US economy in largely uncharted waters, with high inflation, low unemployment, geopolitical tension, and exceedingly hawkish Fed, banks are steadily preparing for scenarios including those in which the labor market begins to crack. For now, at 3.6% unemployment, strong trends in spending and jobs remain.

THE WEEK AHEAD

US Existing Home Sales & Housing Starts (Tue) • Bank of Japan Policy Meeting (Wed) • Eurozone PMI Reports (Fri)

Stock and bond values fluctuate in price so that the value of an investment can go down depending on market conditions. The two main risks related to fixed income investing are interest rate risk and credit risk. Typically, when interest rates rise, there is a corresponding decline in the market value of bonds. Credit risk refers to the possibility that the issuer of the bond will not be able to make principal and interest payments. There may be less information available on the financial condition of issuers of municipal securities than for public corporations.

Data Source: Morningstar, Federal Reserve, coindesk, US Energy Information Administration, Yardeni Research (sector performance).

5-year inflation expectations are calculated as the yield difference between US Treasury Securities and Treasury Inflation-Protected Securities (TIPS) of the same maturity. High Yield Spreads are based on the ICE BofAML US High Yield Bond Index.

BENCHMARK DEFINITIONS

BBgBarc US Agg Bond TR USD: This index is comprised of approximately 6,000 publicly traded bonds including U.S. Government, mortgage-backed, corporate, and Yankee bonds with an approximate average maturity of 10 years.

BBgBarc US Corporate High Yield TR USD: Includes all fixed income securities having a maximum quality rating from Moody's Investor Service of Ba1, a minimum amount outstanding of \$100 million, and at least one year to maturity.

DJ Industrial Average TR USD: Computed by summing the prices of the stocks of 30 companies and then dividing that total by a split-adjusted value.

MSCI EAFE NR USD: This Europe, Australasia, and Far East index is a market-capitalization-weighted index of 21 non-U.S., industrialized country indexes.

MSCI EM NR USD: captures large and mid cap representation across 27 Emerging Markets (EM) countries*. With 1,397 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.

MSCI USA High Dividend Yield NR USD: The index is designed to reflect the performance of equities in the parent index (excluding REITs) with higher dividend income and quality characteristics than average dividend yields that are both sustainable and persistent.

MSCI USA Minimum Volatility (USD) NR USD: composed of U.S. equities that, in the aggregate, have lower volatility characteristics relative to the broader U.S. equity market.

MSCI USA Momentum NR USD: measures the performance of U.S. large- and mid-capitalization stocks exhibiting relatively higher momentum characteristics.

MSCI USA Quality NR USD: The index aims to capture the performance of quality growth stocks by identifying stocks with high quality scores based on three main fundamental variables: high return on equity (ROE), stable year-over-year earnings growth and low financial leverage.

NASDAQ Composite TR USD: The Nasdaq Composite Index is the market capitalization-weighted index of over 2,500 common equities listed on the Nasdaq stock exchange.

Russell 1000 Growth TR USD: Tracks the companies within the Russell 1000 with higher price-to-book ratios and higher forecasted growth values.

Russell 1000 TR USD: Consists of the 1000 largest companies within the Russell 3000 index, which represents approximately 98% of the investable US equity market. Also known as the Market-Oriented Index, because it represents the group of stocks from which most active money managers choose.

Russell 1000 Value TR USD: Tracks the companies within the Russell 1000 with lower price-to-book ratios and lower forecasted growth values.

Russell 2000 Growth TR USD: Tracks the companies within the Russell 2000 Index that have higher price-to-book ratios and higher forecasted growth values.

Russell 2000 TR USD: Consists of the 2000 smallest companies in the Russell 3000 Index.

Russell 2000 Value TR USD: Tracks the companies within the Russell 2000 Index that have lower price-to-book ratios and lower forecasted growth values.

Russell Mid Cap Growth TR USD: Tracks the companies within the Russell Midcap Index with higher price-to-book ratios and higher forecasted growth values.

Russell Mid Cap TR USD: Measures the performance of the 800 smallest companies in the Russell 1000 Index, which represent approximately 25% of the total market capitalization of the Russell 1000 Index.

Russell Mid Cap Value TR USD: Tracks the companies within the Russell Midcap Index having lower price-to-book ratios and lower forecasted growth values.

S&P 500 TR USD: A market capitalization-weighted index composed of the 500 most widely held stocks whose assets and/or revenues are based in the US; it's often used as a proxy for the U.S. stock market. TR (Total Return) indexes include daily reinvestment of dividends.
